

BoutiqueOS

Dress Rental Management Software

Quick Start Guide | Version 1.0

1. Getting Started

Step 1 — Download the Software

VV Tech will send you a download link on WhatsApp.

- 1** Open the link
Click the download link — a file called BoutiqueOS_v1.0.zip will download to your computer.
- 2** Find the ZIP file
Go to your Downloads folder. You will see a file named BoutiqueOS_v1.0.zip.
- 3** Extract the ZIP
Right-click on the ZIP file → click "Extract All" → click "Extract". A new folder called BoutiqueOS will appear.
- 4** Open the folder
Double-click the BoutiqueOS folder to open it. Inside you will see a folder called main.dist.

Step 2 — Create a Desktop Shortcut

So you can open the software easily every day:

- 1** Open main.dist
Double-click the main.dist folder to open it.
- 2** Find BoutiqueOS.exe
Look for a file called BoutiqueOS.exe — it has the BoutiqueOS logo icon.
- 3** Create shortcut
Right-click on BoutiqueOS.exe → click "Send to" → click "Desktop (create shortcut)".
- 4** Done!
A shortcut now appears on your Desktop. Every day, just double-click this shortcut to open BoutiqueOS.

⚠ Important: Do NOT move or delete the main.dist folder. The shortcut only works if the folder stays in the same place.

2. First Time Setup

Step 1 — Enter Your License Key

The first time you open BoutiqueOS, a License screen will appear. VV Tech will provide your license key on WhatsApp.

- 1 Type the key
Enter the license key exactly as given — no spaces at the start or end.
- 2 Click Activate
Press the Activate button. You will see a green success message.

⚠ Note: The license key works on one computer only. If you change your computer, contact VV Tech.

Step 2 — Create Admin Account

After activation, you will be asked to create your admin login.

- 1 Enter username
Type a username — for example: admin or your name.
- 2 Enter password
Choose a password you will remember. Write it down somewhere safe.
- 3 Click Create Admin
Your account is created. You will go to the main screen.

⚠ Important: Do not forget your admin password. If lost, contact VV Tech.

Step 3 — Fill Your Store Details

Go to Settings (bottom of the left menu) and fill in:

- Store Name
- Store Mobile Number
- GST Number (if applicable)
- Default Booking Days
- Terms and Conditions for receipt

3. Where is Your Data Saved?

All your data is saved on YOUR computer — not on the internet. Even without internet, everything works.

Database (Bookings)	BoutiqueOS folder → RentalDashboard.db
Receipts (PDF)	BoutiqueOS folder → PDF_receipts folder
Inventory File	BoutiqueOS folder → Inventory.csv

Your folder looks like this:

BoutiqueOS/
main.dist/ ← Software (do not touch this)
BoutiqueOS.exe ← Double-click to open
RentalDashboard.db ← All your bookings & customers
PDF_receipts/ ← All printed receipts
Inventory.csv ← Dress inventory

✓ **Good news:** When you install a new version, only main.dist is replaced. Your bookings and receipts are never deleted.

4. Taking Backup

Take a backup every week so your data is safe if anything goes wrong with your computer.

- 1** Open Settings
Click Settings in the left menu.
- 2** Click Backup
Find the Backup button and click it. The software saves a copy of your database.
- 3** Extra safety
You can also copy the file RentalDashboard.db to a pen drive or WhatsApp it to yourself.

⚠ **Warning:** If your computer crashes and you have no backup, all booking history will be lost. Please backup regularly.

5. Installing a New Version

When VV Tech sends a new version, follow these steps:

- 1** Download new ZIP
Click the new download link sent by VV Tech on WhatsApp.
- 2** Extract the ZIP
Right-click the new ZIP → Extract All.
- 3** Delete old main.dist
Go to your BoutiqueOS folder. Delete the old main.dist folder.
- 4** Copy new main.dist
Copy the new main.dist folder into your BoutiqueOS folder.
- 5** Open the software
Double-click your Desktop shortcut. All your data will be there.

⚠ **Remember:** Never replace only the EXE file. Always replace the entire main.dist folder.

6. Support

Software	BoutiqueOS v1.0
Developed by	VV Tech
Website	boutiqueos.in
Support	Contact your VV Tech representative on WhatsApp
